## DETAILED ACTION

### ***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Groups	Claim No.	Claim limitations/technical features
1	1,2,3,4-13	A body with predetermined length and a drill insertion hole
2	14	A body with predetermined length and a direction indication means
3	16	A body with predetermined length and a cutter
4	19	Hollow tube
5	20	a forming portion and an insert portion
6	21	a connecting member and a drilling member

Currently, no claims appear to be generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons

Groups 1, 2 and 3 lack unity since the special technical feature, body with a predetermined length and/or a drill insertion hole lacks novelty, as evidenced by the Fenick (US Patent 5,133,660). Fenick teaches a device for locating a position for a tooth implant having a predetermined length and a drill insertion hole as in figure 14.

Groups 3, 4, 5 and 6 in table above lack unity since there is no technical feature common to all the claims. Similarly, Groups 1, 4, 5 and 6 have no common technical features. In addition, Groups 1, 3, 4 and 5 have no common technical features.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

2. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. A telephone call was made to Sherr Daniel on 03/25/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
